DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Holy et al., EP 0 552 876 (hereinafter "Holly"). Holly teaches a vinyl-based polymer having a Mw of less than 10,000 and a process for preparing such polymer wherein the process occurs in a continuous reactor at temperatures, process times and rates of the claimed invention. See Holly, Abstract; page 3, line 38 through page 6, line 13. Holly further teaches post-polymerization or second step whereby an initiator is introduced further polymerizing monomers at temperatures, reaction times and conversion rates within the ranges provided in the claimed invention. See Holly, page 6, line 38 through page 7, line 26. Holly further teaches the use of a broad hosts of monomers to prepare the vinyl based polymer. See Holly, page

4, line 30 through page 5, line 18. The Examiner contends that Holly anticipates the present claims by teaching the vinyl-based polymer and processes of the claimed invention.
